DIVISION OF POLICE

HARRY J. WERNKE
DIRECTOR OF SAFETY
EUGENE T. WEATHERLY
CHIEF OF POLICE

C. O. SHERRILL
CITY MANAGER

Mr. Harry J. Wernke Director of Safety City Hall Cincinnati, Ohio

Sir:

I am submitting the following report containing statistics showing the principal activities of the Force and items of general interest occurring during the year 1938.

Serious crimes have decreased during the year and Cincinnati, while still generally above the national average, now compares more favorably with other large cities of the nation than it did last year. Our police, moreover, were more active in making arrests and clearing offenses. Our percentage of clearance for this year is 43 against a figure of 40 for last year, indicating an increase of 7.5% in this regard.

The vehicular accident picture also shows improvement. Twenty-one less people met death in traffic accidents this year and, coupled with a 4.1% drop in the number of accidents, there has been a 13.6% decrease in number of persons injured. Our "enforcement index" for the past year has averaged around 14, which indicates that our police are doing very creditable work in the field of accident prevention.

The number of accidents occurring here, however, is still too high. Therefore, we must look to better education of the motoring public in safe driving practices and procedures for further improvement along these lines. Betterment of the city's position in the nation undoubtedly depends upon the attitude of the vehicle drivers.

There are many indications that the traffic situation likewise is improving. Although there were some 4,600 less cars on the streets during the year, we were able to reduce the number of traffic citation tags necessary by 30,757. The daily average number of tags issued during the year was 291.3 as against 375.5 for 1937, a decrease of 22.4%.

A new form of citation tag book was adopted during the year, changes were made in the office procedure of the Traffic Bureau and the "memo" system was initiated. A closer watch was kept on ignored tags and more effort was made to locate delinquent violators. As a result we were able to get an answer to 80.8% of the tags issued as against 72.5% last year. Our "outstanding file" is smaller by 39.7% this year and impoundage fees increased 143.1% over last year amounting to more than twice the average of the three previous years.

When traffic offenses involving moving vehicles are not serious, warnings are given instead of tags. This practice has been increased this year and has resulted in 10,316 warnings and a corresponding decrease in the number of cases necessary for court action.

Arrests for speeding increased 50% this year with the acquisition of 21 new automobiles equipped with special speedometers and sirens. These cars have proved very successful in this work and are a distinct improvement over motorcycles. A new loudspeaker car and a new wrecker were purchased.

Mr. Harry J. Wernke

Page 2 (cont.)

During the year our radiotricians constructed and installed 32 of the new crystal-control type radio receiving sets at a unit cost of \$37.04 each. We also equipped eight vehicles of other departments with receivers. Station WKDU now, in addition to our police, fire, park, hospital, highway, and utilities departments, serves as a central clearing point for 47 police units in this region over the air and by telephone.

Early in the year a new teletype system was installed under a contract entered into with the Bell Telephone Company. We are now in readiness to "plug in" on other systems should the proposed state-wide system be approved.

Members of the Department were assigned to 14 strikes during the year. Order was maintained in every case without assistance. There were no lives lost, very little violence committed and damage done to property was negligible.

The Juvenile Court referred 16 delinquent juveniles to the police "Big Brothers" in 1938. These are patrolmen who volunteer to aid these wayward minors to become law-abiding boys. In this work we have the germ of a crime prevention bureau and it is our hope that this can eventually be expanded into a regular unit of the Department.

During the year we undertook to investigate all persons receiving public relief. Patrolmen called on relief clients on their beats to determine whether those who were receiving relief were entitled to it. As a result, the Welfare Department was able to issue "stop orders" for a large number of cases.

For a little over a year roughly one-third of all thefts in the city have been from vehicles parked on the streets. One-fifth of the total were cases in which merchandise was taken from within, necessitating an entry into the cars. In the other cases, accessories or parts were stolen. In order to curb this, we initiated a movement for legislation making auto looting and tampering a felony, thereby making this type of crime unprofitable.

The need for a police headquarters building is becoming increasingly apparent. Several of our important units are now located at a distance from each other and many advantages would accrue from having them under one roof. Such a building might also house the municipal courts and should prove to be a distinct asset to the city as a whole.

This year the white shirt was chosen as regulation for all officers and a new lightweight uniform for summer wear was adopted. The men were also permitted to appear without coats during the extremely hot weather. For winter comfort, the overcoat was changed to a new design having a combination lapel that can be adjusted as a collar for the coldest weather.

We are happy to report that no one was killed in the line of duty this year. However, the Department has suffered from 36 separations bringing the total strength down to 708, as we were able to add only 29 recruits. This is 31% below the figure that would be necessary to enable our Force to equal in strength those of other large cities of the nation. While the addition of the 319 men that this calls for may not be advisable at present, we could easily absorb 150 men and could function more efficiently with a larger force.

Respectfully submitted,

agent Meatherly

### AN OUTLINE OF CINCINNATI POLICE HISTORY

Settled in 1788, and a frontier town for many years, Cincinnati was incorporated as a village in 1802, with a population of some 800 souls. Today, the City of Cincinnati comprises approximately 473,000 persons.

Earliest policing dates from 1803, when a night watch of all male citizens over 21 years of age, serving in rotation without pay, was established by the President of Council (Mayor). Each man thus serving carried a watchman's rattle for summoning assistance and giving signals.

With Cincinnati's rapid growth to a city, certain citizens, irked by their enforced duty as watchmen, initiated a movement in 1819 to establish a fund to pay for the services of professional night-watchmen to be appointed by the Mayor. In that year the City's population was 9,000, and the corporation limits were from Sixth Street to the Ohio River and from Eggleston Ave. to Walnut St. By 1826, this watch numbered two captains and eighteen patrolmen.

Finally, in 1834, City Council passed an ordinance levying a tax on property owners to pay for the salaries of these men. Thus was created a true "police force" under direct responsibility to the taxpayers of the city, the first of its kind to be established anywhere in the world. In 1842, a day watch of two men was added to supplement the night force. In 1855, when there were a hundred men on the force and the city's population was approximately 135,000, three detectives were appointed for special investigation work.

From the earliest date the city watchmen were under the authority of the various town or city marshals. In 1859, the position of City Marshal was abolished and that of Chief of Police created. This latter title was changed, in 1873, to that of Superintendent of Police.

All appointments and dismissals of police personnel from the beginning were on a political basis, at the pleasure of the mayors in office. In 1886, however, a non-partisan Board of Police Commissioners was established by state law to take over the direct supervision and control of the force from the Mayor, with selection on a merit basis from a non-political eligible list as the requisite for appointment or promotion.

In 1903, a Board of Public Safety was formed by a merger of the Boards of Police and Fire Commissioners. At this time the position of Chief of Police was re-established. Six years later, however, in 1909, the Board of Public Safety was abolished, and a Director of Public Safety was appointed to assume charge of the police, fire, welfare, and other safety functions.

In 1910, the merit system of appointments and promotions was fortified by the passage of the present Civil Service Law, the formation of a Board of Commissioners and the appointment of a Civil Service-Examiner. The population of Cincinnati was then 363,591 and the 649 men on the police force patrolled 49 square miles, the approximate area of the city at that time.

Because of the increasing use of fingerprint records, the Bertillon Department, which was established in 1892, became the Bureau of Identification in 1912. The year 1913 witnessed the discard of the horse-drawn vehicles and the motorization of the patrol wagon service, together with the use of motorcycles for traffic patrol. By 1920 the city had grown to 401,247 and the police force consisted of 696 men.

On January 1, 1926, the City Charter form of government was inaugurated, placing the police, together with all other executive branches of the municipal service, directly under the control of the City Manager. In 1930 the position of Director of Safety was restored and the force established as the Division of Police of the Department of Safety.

In 1927 the number of police districts was reduced from ten to seven. The control of all traffic matters was removed from the districts and placed under the command of a Superintendent of Traffic. Also, in this year, a teletype system of inter-communication was installed, and the present style of uniform with the .38 caliber revolver was adopted.

In 1928, the motor patrol of beats in outlying districts replaced the foot patrol and the force was completely motorized. During this same year the uniform crime reporting procedure was introduced and a centralized Bureau of Records was established. In 1930 the Bureau of the Census reported the City's population as 451,160. There were then 662 names on the police payroll.

Communication was considerably improved in 1931 by the establishment of Station X and the completion of the police radio installation, which had been begun in 1930. Also in 1931, the City Retirement System was established, replacing the Police Relief Fund for members who chose to join and for all recruited thereafter.

In 1933 the city-wide Safety Patrol was formally established and in 1934, with the number of deaths from vehicular accidents constantly increasing, the first unit of an accident investigation squad was added. In 1936 the Traffic Accident Investigation Squad was formally organized with especially selected and trained men in motor cars equipped with cameras, measuring tapes, road flares, first aid kits, etc.

A noteworthy addition to the police activities was also made in 1934 when, with the formation of the Institute of Legal Medicine, the Police Crime Laboratory was established. Located in the Pathological Building of the Cincinnati General Hospital and equipped with ballistic, x-ray, polygraphic, photographic, microscopic and other equipment, its operation united the efforts of the police, the Hospital and the University of Cincinnati in alleviating crime and apprehending criminals.

Effective January 1, 1936, Central Station was established at City Hall for the purpose of centralizing at one point instead of seven the registration and detention of all persons arrested. 1937 saw the greatest flood in the city's history, when the Ohio River rose to an unprecedented crest of 80 feet. The police personnel in this year numbered 714, the population of the city was 473,421 and its area approximately 72 square miles. Together with the adjacent cities and villages, the region known as Greater Cincinnati comprises a metropolitan area with a population of nearly 850,000. The frontier town of 149 years ago has grown into one of the world's great cities.
